BIX Card

Setup & Funding Guide

Install · Verify · Fund · Cards · Link JetUP Portal

Step-by-step with screenshots · iOS & Android

Xlife Solutions

Based on official BIX Help Center (help.bix.fi) · September 2026

What this guide covers

- Download and install the BIX (BixPay) app
- Create your account and complete identity verification (KYC)
- Deposit crypto into your self-custody BIX Wallet
- Order a virtual Visa card and a physical (plastic) card
- Top up / load money onto the card (no top-up fee)
- Add the card to Apple Pay or Google Pay
- Link your BIX wallet to the JetUP IB Portal and find your ID numbers

Note: UI labels can change slightly with app updates. When in doubt, follow the in-app prompts and the video guides inside help.bix.fi. Pricing shown is from the BIX Help Center at the time of writing.

1. Install the BIX app

BIX is a non-custodial crypto wallet paired with a Visa card. You spend against stablecoin collateral (USDT / USDC) while keeping control of your keys. The mobile app is listed as BixPay in the stores.

Steps

- Open a browser and go to https://bix.fi (or open the App Store / Google Play directly).
- Tap Download the BiX app → choose App Store (iPhone) or Google Play (Android).
- Install BixPay (developer: BIX). The app is free to download.
- Open the app and allow notifications if prompted (useful for one-time codes and security alerts).

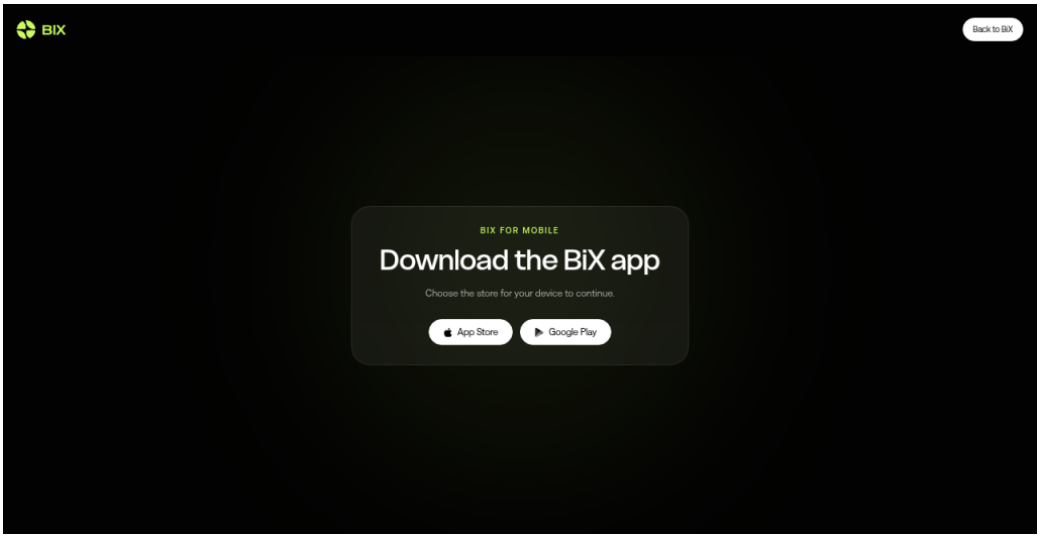

Figure 2 — “Download the BiX app” — choose App Store or Google Play.

App Store & Google Play

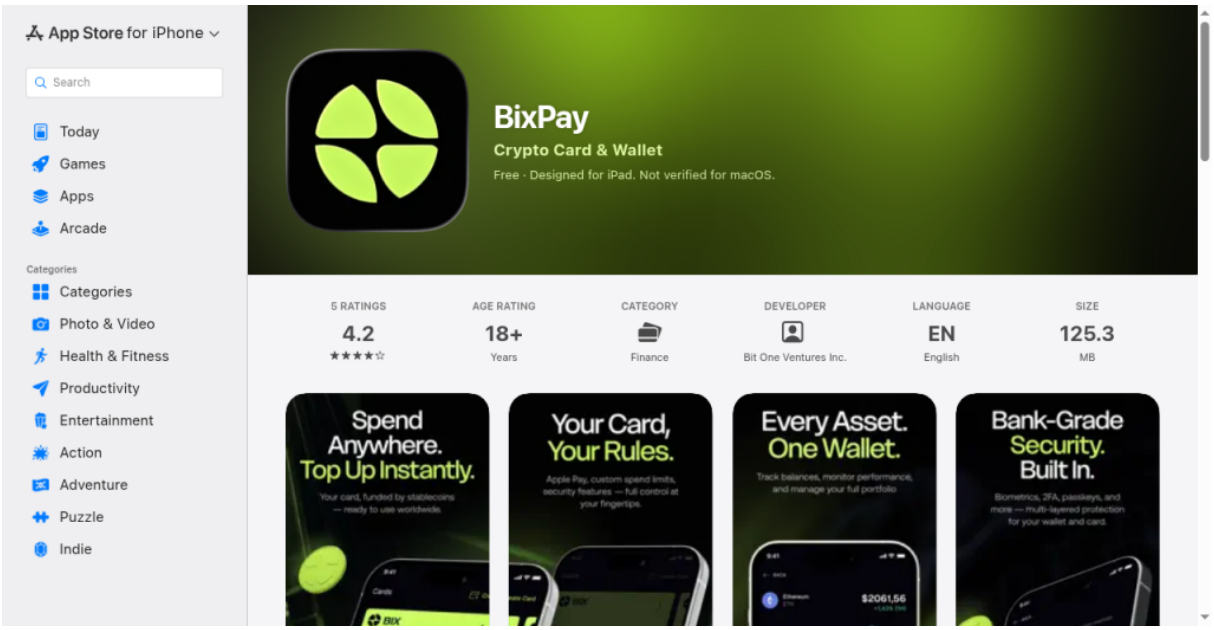

Figure 3 — Apple App Store listing for BixPay.

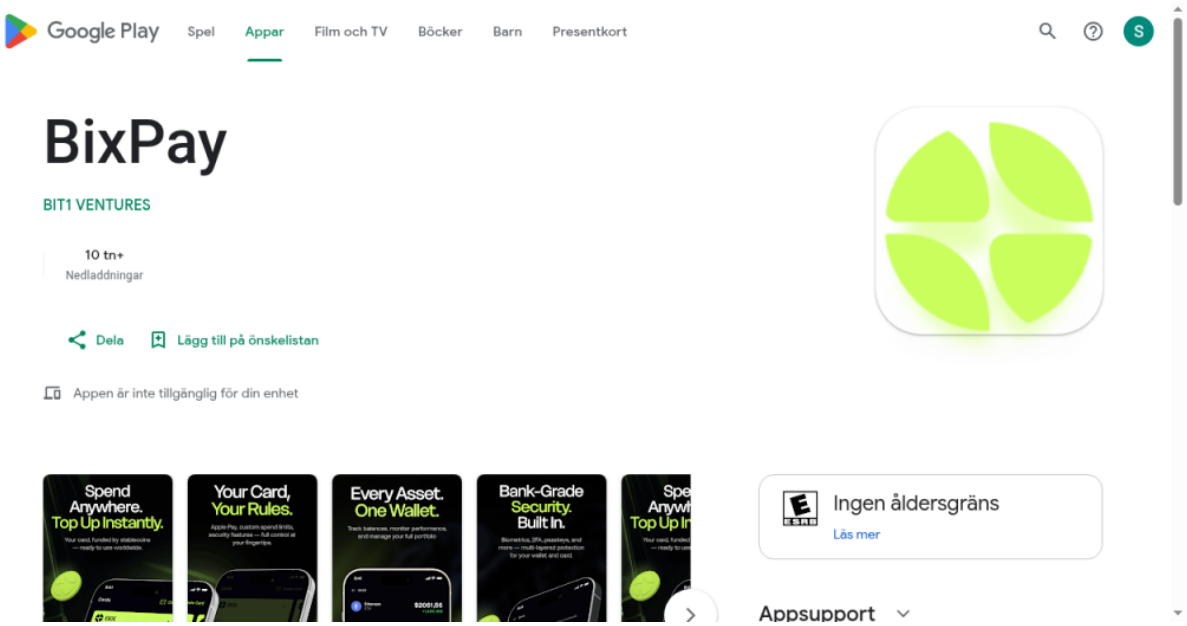

Figure 4 — Google Play listing for BixPay (availability depends on your country/device).

2. Create your BIX account

After install, complete the step-by-step registration inside the app. Official written help is thin here — BIX provides a short video guide in the Help Center under account creation.

Typical flow

- Open BixPay and start Sign up / create account.
- Enter your email (and phone if asked) and set a strong password or passcode. If you are in JetUP / Xlife: use the exact same email as your JetUP IB Portal account — this is required to link later.
- Confirm the email / SMS code sent to you.
- Secure your wallet: write down your recovery / seed phrase offline if shown. Never share it. BIX will never ask for it in chat or email.
- Enable 2FA when offered — strongly recommended.

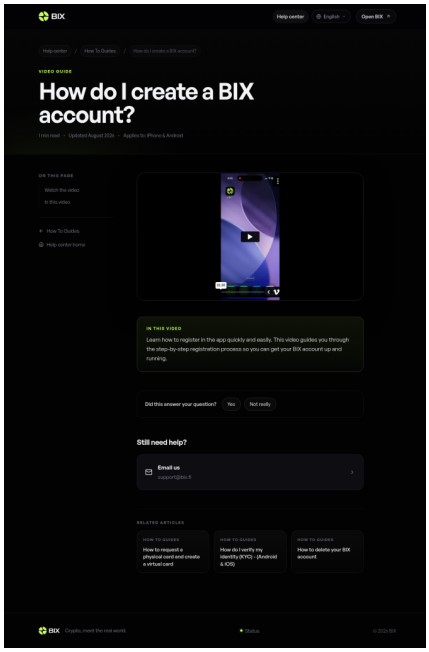

Figure 5 — Help Center: create your BIX account (video guide).

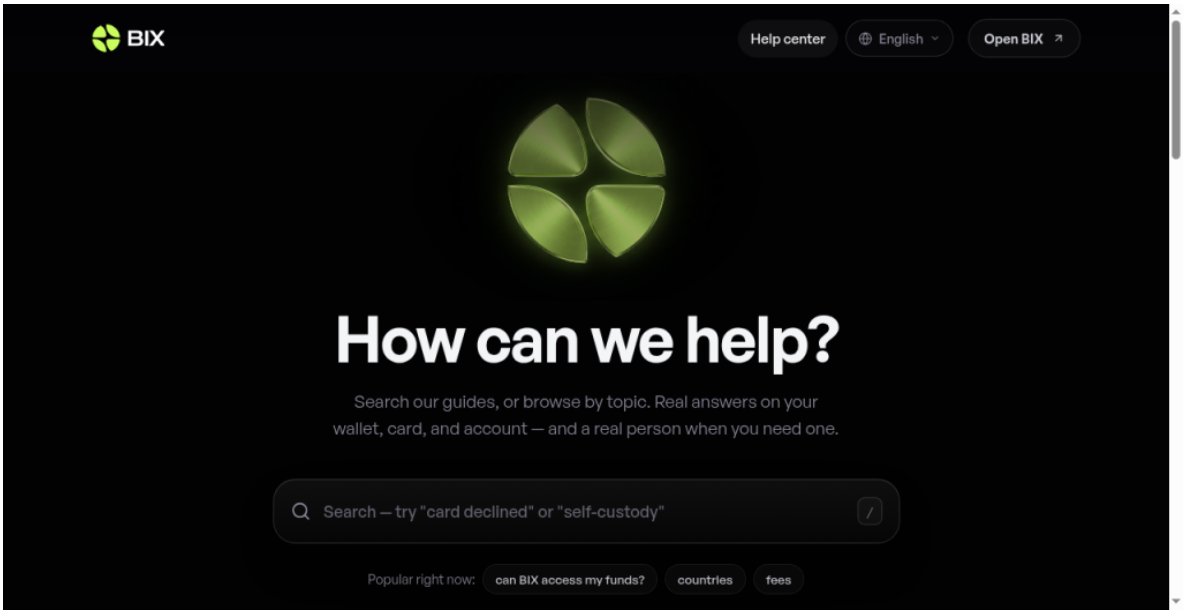

Figure 6 — BIX Help Center home (help.bix.fi) — categories for cards, KYC, deposits, and more.

3. Identity verification (KYC)

Before you can fully use the card programme you must complete KYC. Follow the in-app steps and the Help Center video.

Document rules (from BIX Help)

- Choose one current accepted identity document from the list shown in the app / Help article.
- Use the physical original — not a photo of a photo, screenshot, or photocopy.
- Submit proof of address that shows your full name and current address, issued within the current month (utility bill, bank statement, etc., as accepted in your region).
- If the app asks for extra documents, upload them from the verification screen.
- Wait for approval before ordering cards if the app blocks card creation until KYC is complete.

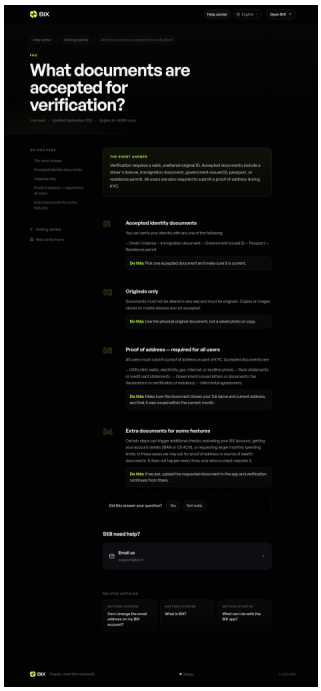

Figure 7 — Accepted verification documents and proof-of-address requirements.

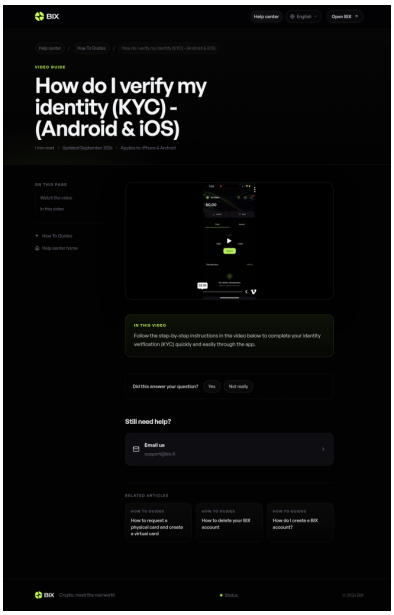

Figure 8 — KYC video guide in the Help Center.

4. Fund your BIX Wallet (deposit crypto)

The card spends against collateral in your self-custody wallet. First deposit supported stablecoins (USDT / USDC on supported networks such as Ethereum, BNB Chain, Base, Solana, Optimism — check the app for the exact network list).

Steps

- In the app, open Wallet / Deposit (or Receive).
- Select the asset (e.g. USDT or USDC) and the correct network. Sending on the wrong chain can mean lost funds.
- Copy your deposit address or scan the QR code from another exchange/wallet.
- Send a small test amount first if you are new to the network.
- Wait for confirmations until the balance shows in BIX.
- Optional: use the in-app fiat on-ramp (bank transfer or debit/credit card) if available in your region to buy crypto.

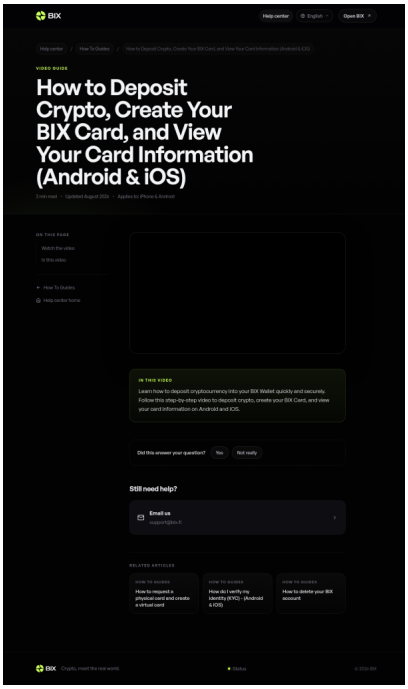

Figure 9 — Help: deposit crypto, create your card, and view card details.

5. Order a virtual BIX Card

The virtual Visa card is available immediately after setup (subject to KYC and regional eligibility). Use it for online payments and add it to Apple Pay / Google Pay for contactless spend.

Steps

- In the app, open the Cards section.
- Choose Create virtual card / Virtual BIX Card.
- Confirm the fee and terms (Help Center lists virtual card at $9.99).
- Complete payment from your wallet balance if prompted.
- When issued, open the card to view number, expiry, and CVV (usually behind a reveal / manage screen).
- You can now top up the card (next section) and start spending where Visa is accepted online.

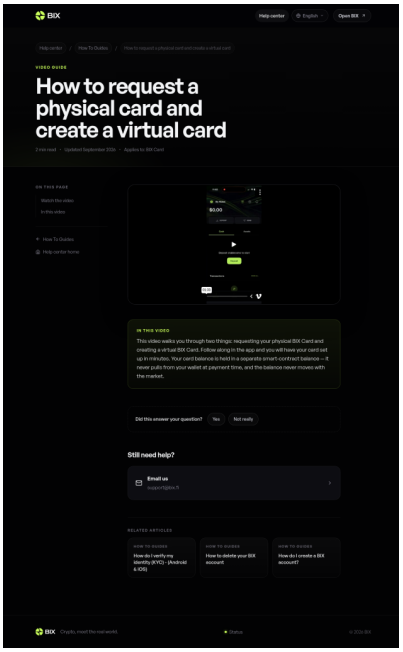

Figure 10 — Help guide: create a virtual card and request a physical card.

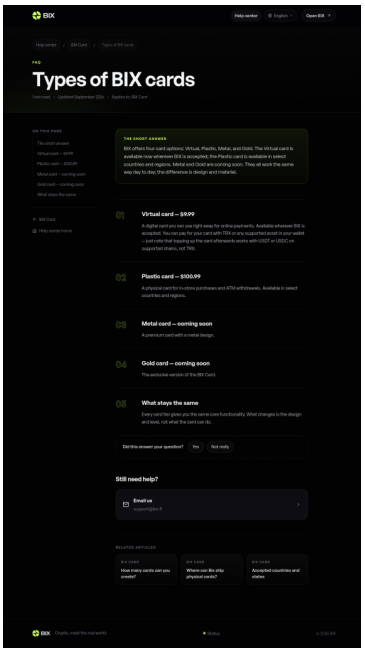

Figure 11 — Card types & pricing (Help Center). Virtual $9.99 · Plastic $100.99 · Metal/Gold coming soon.

6. Order a physical (plastic) BIX Card

Physical cards ship by post. Pricing in the Help Center: Plastic card — $100.99. Metal / Gold tiers are listed as coming soon. Delivery times and eligible countries depend on the programme.

Steps

- Open Cards in the BIX app.
- Select Request physical card / Plastic card.
- Confirm name to emboss (if asked) and enter a valid shipping address.
- Pay the card fee from your balance.
- Track status in-app until the card arrives.
- When it arrives: activate in the app if required, then set or reveal your PIN under Manage.

Tip: Many users start with the virtual card the same day, then upgrade to plastic for ATMs and in-store swipe/chip use.

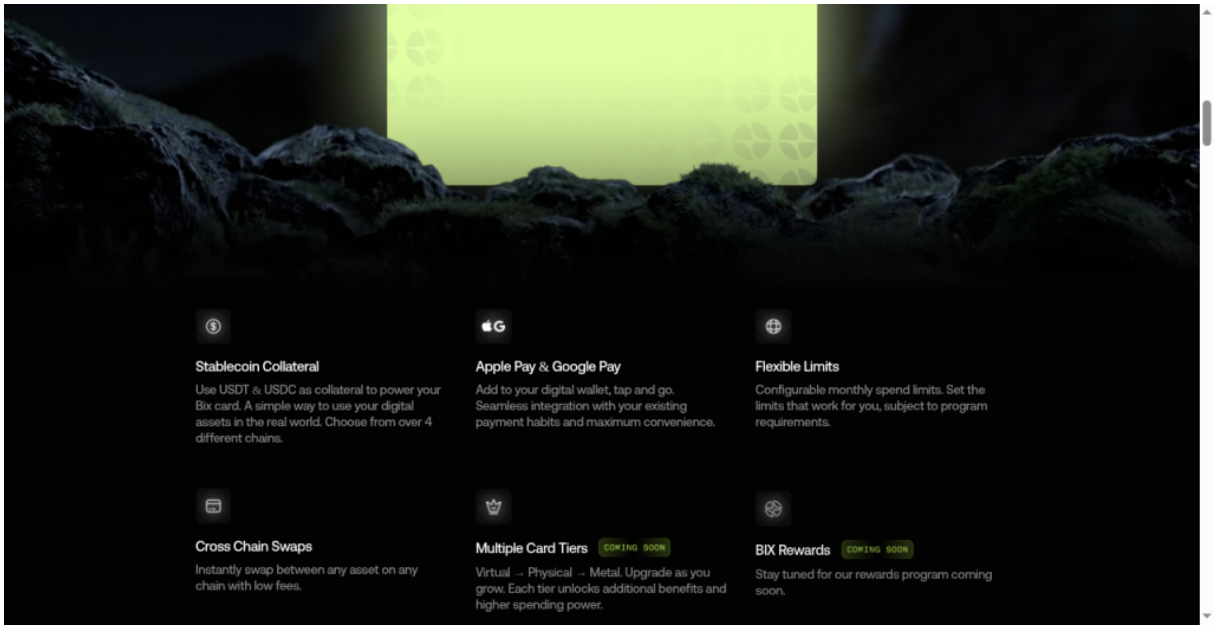

Figure 12 — BIX marketing: Virtual → Physical → Metal card tiers.

7. Load money / top up the card

Until direct wallet-linked spending is fully rolled out everywhere, you top up the card from your BIX Wallet. Official Help text: top up in near real time with no fee for topping it up.

Steps

- Open your BIX Card in the app.
- Tap Top up / Fund / Load (label may vary).
- Choose amount and confirm — funds move from wallet collateral to the spendable card balance.
- Check the new card balance before you pay.
- Optional management from the same area: transfer balance back to wallet, set spend limits, freeze / unfreeze, change PIN or card name, delete or create a card (see Help video).

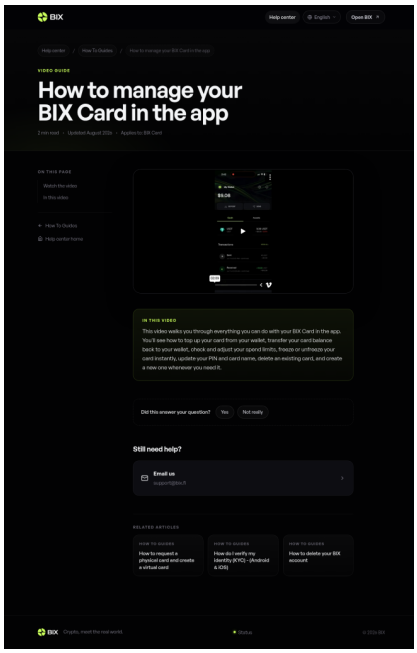

Figure 13 — Card management & top-up video guide.

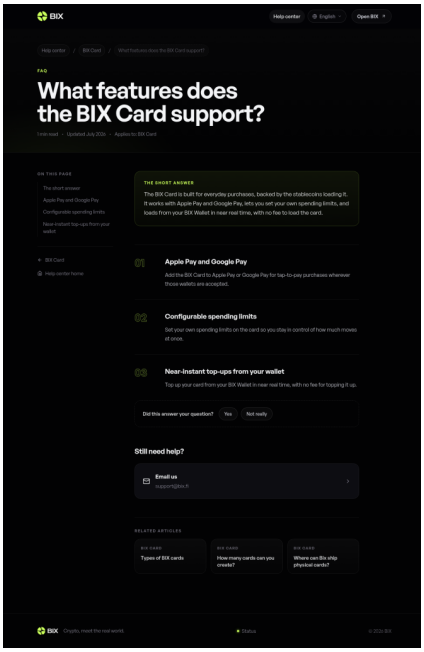

Figure 14 — Features: top up from wallet in near real time, no top-up fee.

8. Add to Apple Pay or Google Pay

From the official Help article:

- Open the card in BIX and tap Manage.
- Tap Add to Apple Wallet or Add to Google Wallet.
- Review the confirmation and agree to the card terms.
- Alternative: Open Apple Wallet / Google Wallet → tap + → Debit or Credit Card.
- Choose manual entry; copy card number, expiry, and CVV from BIX.
- Enter the one-time code sent to your BIX account email.

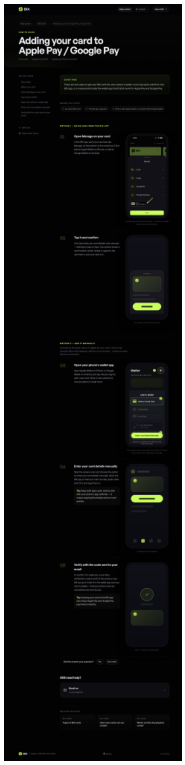

Figure 15 — Full Apple Pay / Google Pay setup article.

9. Link BIX to JetUP IB Portal

Xlife / Tag Markets partners use the JetUP IB Portal (https://jetup.ibportal.io). Linking connects your BixPay wallet to that portal. Official JetUP guidance (Telegram + YouTube Short): linking is done with a QR code and the same email — you do not type your IB / CU / BIX ID into a form to connect.

Important: Install and open BixPay before you scan the portal QR. Scan only inside the app (Settings → Scan QR). Do not scan the portal QR with your phone camera.

Five official steps

- Go to https://bix.fi and download the app (App Store / Google Play).
- Install BixPay and register with the same email as your IB Portal account.
- In the IB Portal open Profile → BIX Wallets & Debit Card → tap Register (a QR code opens).
- In BixPay: Settings → Scan QR → scan the code from the portal (not with the phone camera).
- Tap Approve — your wallet is linked to the IB Portal.

Source: JetUP official “How to Link Your BIX Card Wallet to the IB Portal” (YouTube Short + jet_up_official Telegram).

Your ID numbers in JetUP

After you are registered (and after BIX is linked), open Profile in the IB Portal. At the top you will see copyable IDs. Use these when support, upline, or Xlife asks for “your ID”:

- ID — your IB number (example format: IB……). This is your main partner / IB ID.
- TID — your Tag / CopyX ID (often starts with CU……). Also called your CU number in JetUP promos.
- Bit1 ID — ID for the Bit1 crypto exchange section (if activated).
- BIX ID — your BIX identifier after the wallet is linked (long hex string). Visible on Profile once connected.

Tip: tap the copy icon next to each ID in Profile so you paste the exact value. Keep IB ID and TID/CU handy for Zoom reports, support tickets, and team onboarding.

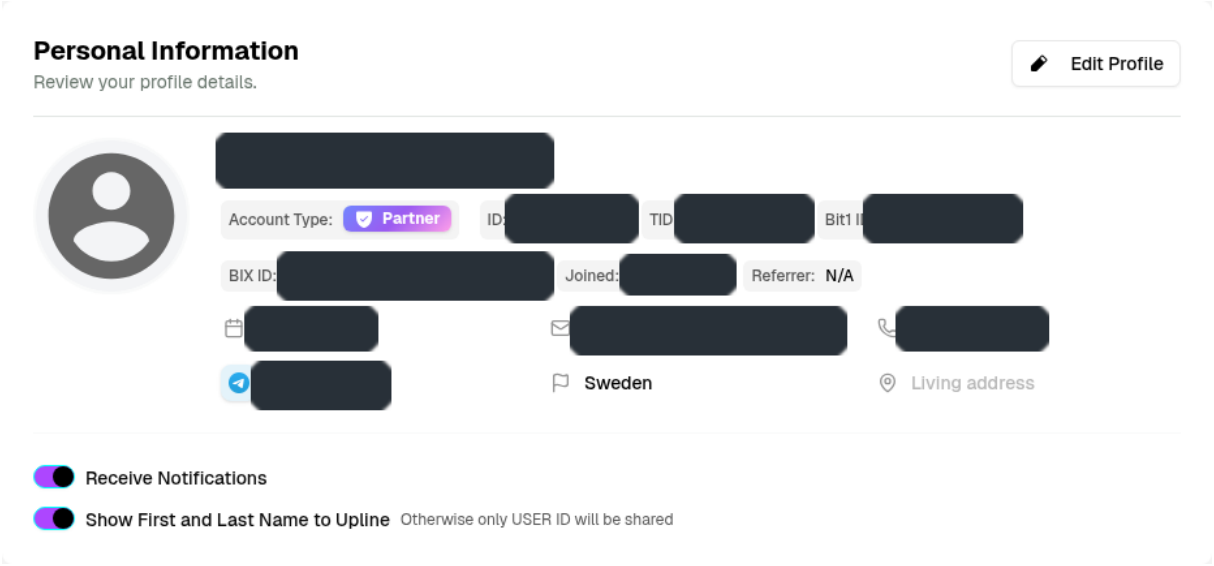

Figure 16 — JetUP IB Portal → Profile: ID, TID (CU), Bit1 ID, and BIX ID (personal details redacted).

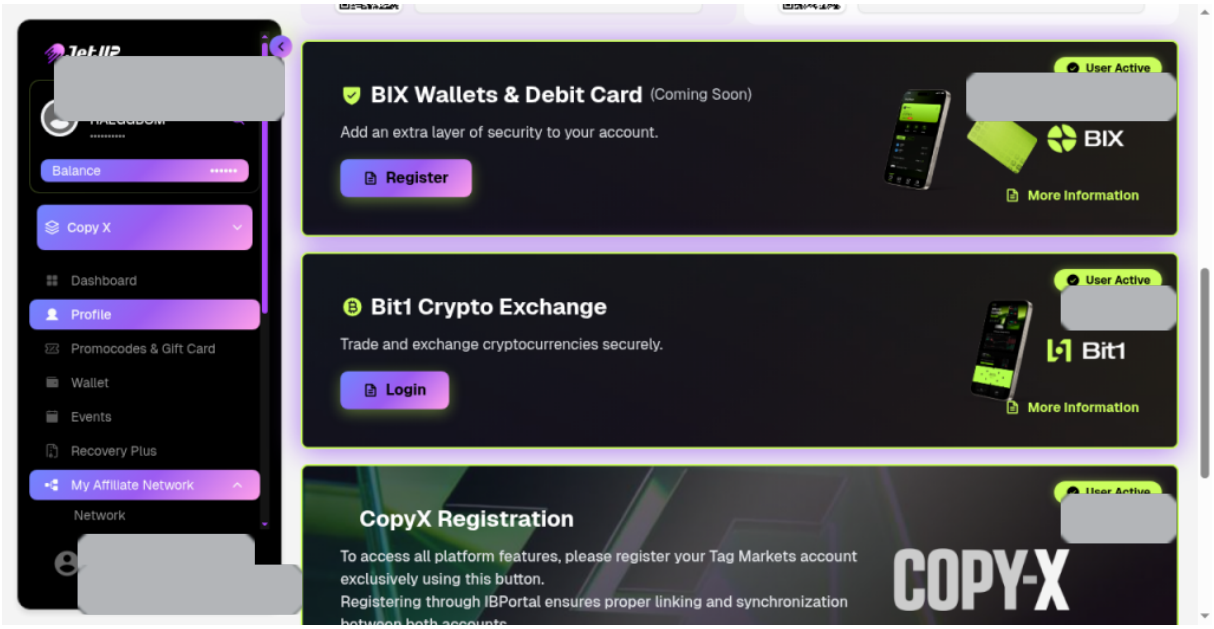

Figure 17 — Profile → BIX Wallets & Debit Card (Register / linked status; personal IDs redacted).

Free virtual card campaigns (when live) may require a qualifying deposit and syncing BIX from this Profile section; follow the portal promo text after linking.

10. Pricing snapshot & support

Item	Amount (Help Center)
App / standard membership	Free to download
Virtual Visa card	$9.99
Plastic (physical) card	$100.99
Metal / Gold cards	Coming soon
Card top-up fee	No fee (per Help Center)
FX / ATM fees	May apply by region — check in-app terms

- Always verify fees and eligibility in the live app before paying.

Quick checklist

- ☐ Install BixPay from App Store or Google Play
- ☐ Create account with the same email as JetUP IB Portal + secure recovery phrase / 2FA
- ☐ Complete KYC (ID + proof of address)
- ☐ Link BIX to JetUP: Profile → BIX Wallets & Debit Card → Register → Scan QR in app → Approve
- ☐ Copy your IB ID, TID (CU), and BIX ID from JetUP Profile
- ☐ Deposit USDT/USDC on the correct network
- ☐ Create virtual card ($9.99) and/or order plastic ($100.99)
- ☐ Top up card from wallet (no top-up fee)
- ☐ Optional: Add to Apple Pay / Google Pay

Prepared for Xlife Solutions members. Content summarized from public BIX Help Center, JetUP official Telegram/YouTube linking guide, and IB Portal Profile screenshots (September 2026). BIX and JetUP may update fees, UI, and availability — the live app, help.bix.fi, and jetup.ibportal.io take priority.
